Work experience

Full stack Developer

Since June 2024 ()

2Peerfect, Rabat

- Development of a comprehensive platform for a pre-existing AI solution, allowing users to browse and add media assets.
- Design of an advanced video editor for editing, mixing, adding styles, and exporting customized videos.
- Customization of avatars, boards, content, and voices for the generation of educational videos.
- Integration of a user dashboard and an admin panel for centralized management.

Developpeur MERN

From January 2024 to June 2024 ()

ARK-X Talent Factory, Rabat

- Mastery of web technologies for full-stack development (front-end and back-end).
- Setup of servers and API management with Node.js and Express.js.
- Application of CRUD operations for efficient data handling.
- Creation of interactive and responsive user interfaces with HTML, CSS, and JavaScript.
- Expertise in using modern frameworks like React.js for reusable components and efficient state management.
- Seamless integration between front-end and back-end for an optimal user experience.

commercial advisor

From June 2022 to January 2023 ()

DIGISELL, Kenitra

- Prospecting for new clients
- Building customer loyalty
- Presenting products and services
- Sales negotiations

Projects

Real Estate Website

- **Scalable Database:** MongoDB efficiently stores listings, user data, and other relevant information.
- **Robust Back-End API:** Express.js handles user requests, data validation, and server-side logic.
- **Interactive Front-End Interface:** React.js creates a smooth user experience with search, detailed listings, authentication, and optional interactive features.
- **High-Performance Environment:** Node.js ensures seamless communication between the front-end and back-end.

Development of a Library Management Website (Book Management)

- Design and development of a comprehensive website dedicated to library management.
- Use of the MERN stack technologies (MongoDB, Express.js, React.js, Node.js) along with other languages and tools.
- Creation of an intuitive platform allowing users to efficiently manage library books.
- Implementation of a secure authentication system for users.
- Design of a user-friendly and ergonomic interface.
- Implementation of features such as book search, addition of new books, and modification of existing book details.
- Management of book loans and returns.
